Governing law: The Products will be governed by Swiss law and the rights thereunder will be construed accordingly.

Status of the Products: The Products constitute direct, unsecured and unsubordinated general obligations of the Issuer and rank equally among themselves and with all other direct unsecured and unsubordinated general obligations of the Issuer. The

Products do not evidence deposits of the Issuer. The Products are not insured or guaranteed by any government or government agency.

Description of restrictions on free transferability of the Securities

The Products are offered and sold outside the United States to non-U.S. persons in reliance on Regulation S under the Securities Act and must comply with applicable transfer restrictions with respect to the United States.

No offers, sales, resales or deliveries of the Products may be made in or from any jurisdiction and/or to any individual or entity except in circumstances which will result in compliance with any applicable laws and regulations and which will not impose any obligation on the Issuer and/or Leonteq Securities AG (the "**Lead Manager**").

Subject to the above, the Products will be freely transferable.

Where will the Securities be traded?

The Issuer and the Lead Manager do not assume any legal obligation in respect of the realisation of admission to trading as of any particular date or the maintenance of any admission to trading that is realised.

What are the key risks that are specific to the Securities?

The Products are subject to the following key risks:

- ***Investors in the Products may lose up to the entire value of their investment in the Products, depending on the performance of the Underlying(s).***
- ***Risks relating to certain features of the Products:***
 - Investors will be exposed to the performance of the underlying which has the worst performance, rather than the basket as a whole. This means that, regardless of how the other Underlyings perform, if the worst performing underlying in the basket fails to meet a relevant threshold or barrier for the calculation of any redemption amount, investors might receive no return on their initial investment and they could lose some or all of their investment
 - The coupon amount will only be paid if the level, price or other applicable value of the Underlying(s) on the relevant valuation date(s) either reaches or crosses one or more specific barrier(s). It is possible that such level, price or other applicable value of the Underlying(s) on the relevant valuation date(s) will not either reach or cross the barrier(s) (as applicable), and therefore, no coupon will be payable on the relevant coupon payment date. This means that the amount of coupon payable to an investor over the term of the Products will vary and may be zero
 - The payment of coupon amount will be conditional on the value or performance of the Underlying(s). The coupon amount payable will be zero on a coupon payment date if the Underlying(s) do not perform in accordance with the terms of the Products although such payment will be deferred to the next coupon payment date. If the Underlying(s) meet the performance criteria, the coupon payable will be an amount for the current coupon payment date plus any amounts deferred from previous coupon payment dates where coupon was not paid. Investors will not be paid any coupon or other allowance for the deferred payments of coupon and it is possible that the Underlying(s) never meet the performance criteria, meaning that investors will not receive any coupon at all for the lifetime of the Products.
- ***Risks relating to the Underlying(s):***
 - Past performance of the Underlying(s) is not indicative of future performance, and performance may be subject to unpredictable change over time;
 - Investors will not have any legal or beneficial rights of ownership in the Underlyings, and no claim against the share issuer or any other third party in relation to the Underlyings; such parties have no obligation to act in investors' interests.
 - The performance of the Underlying(s) cannot be predicted and is determined by macroeconomic factors which may adversely affect the performance of the Underlying(s) and the value and return on the Products. The share issuer may not act in the interests of investors in the Products and any of these actions could adversely affect the value and return on the Products. Investors in the Products will not have any voting rights or rights to dividends or other amounts or rights in respect of the Underlying(s).
- ***No or limited liquidity:*** The Products may have no liquidity or the market for such Products may be limited and this may adversely impact their value or the ability of the Investor to dispose of them.

- **Secondary market price:** The market price of the Products prior to maturity may be significantly lower than their original purchase price. Consequently, if you sell your Products before their scheduled maturity (assuming you are able to), you may lose some of your original investment.
- **Early redemption:** The Products may be redeemed prior to their scheduled maturity in certain extraordinary circumstances and if an Autocall Event occurs. In such case, investors may only be able to reinvest the proceeds on less favourable market terms compared to when the Products were purchased.

Description of the most material conflicts of interest pertaining to the offer or the admission to trading

The Issuer and its subsidiaries, the Lead Manager and the Calculation Agent deal in and hold interests in the Underlying(s) or in components of the Underlying(s) or in options or futures contracts relating to the Underlying(s) or components thereof in their normal course of business and from time to time may participate in transactions connected to the Products for their own account or on behalf of others. Furthermore, Issuer and its subsidiaries may exercise another function in relation to the Products or Underlying(s) or components thereof, such as issuing agent, calculation agent, paying agent and/or administrative agent. The Issuer and its subsidiaries, the Lead Manager and the Calculation Agent can also receive non-public information regarding the Underlying(s) or components of the Underlying(s), but are not obliged to pass such information on to the investors. The Issuer can involve cooperation partners and external advisors in the issuance of Products, e.g., in the composition and adjustment of a basket or index. It is possible that such cooperation partners and advisors may pursue their own interests in the course of an issuance by the Issuer and when providing their associated advice.

The selling price of the Products, where appropriate in addition to fixed issue surcharges, management fees, performance fees or other fees, may contain surcharges on the initial mathematical 'fair' value of the Products (the "**margin**"). This margin will be determined by the Issuer in its reasonable discretion and can differ from surcharges that other issuers impose on comparable products. This margin covers, among other things, the costs of structuring, market making and settlement of the Products and also includes the expected profit for the Issuer.
